SKILLS

- **Mobile Engineering**: Flutter, Dart, Kotlin, Jetpack Compose.
- **Architecture & Patterns**: Clean Architecture, MVVM, MVC, MVP.
- **Testing & Quality**: Automated Testing (Unit & Integration), JUnit, Profiling, Debugging.

LANGUAGES

- English
- Kiswahili

CERTIFICATIONS

- Software Development (Specialization in Dart and Flutter)- (PLP) Academy.
- AI Career Essentials – ALX Africa.
- Prompt Engineering – Simplilearn.

EDUCATION

Bachelor of Science in Data Science

Meru University of Science and Technology | 2024-2028

PROFILE

Results-oriented Mobile Developer specializing in native development using Kotlin and cross-platform with Flutter. Experienced in implementing robust architectural patterns (Clean Architecture, MVVM) and translating wireframes into high-performance user interfaces. Proven ability to write clean, testable code, debug performance issues, and collaborate closely with cross-functional teams to deliver exceptional mobile experiences from the first line of code to Playstore Store publishing.

PROFESSIONAL EXPERIENCE

Flutter Developer: The Brand AI | 2025 - Present

- Collaborate with designers to implement new user interfaces and interactive mobile features, ensuring optimal app performance and an excellent user experience.
- Engineered and improved the core payment system by integrating the Paystack RESTful API, securely parsing JSON data for reliable transactions.

Lead, Android Community Meru University of Science and Technology | 2026 - Present

- Advise and mentor a team of developers on mobile application architecture and best practices, focusing on writing readable, testable code.
- Ensure adherence to mobile app design guidelines across platforms while overseeing the development of scalable applications in Flutter and Kotlin.
- .

Key Projects

PesaLens

- Built a local-first M-Pesa tracking app using Kotlin and Jetpack Compose, currently in closed testing on the Google Play Store.

AfyaSmart – AI Health Assistant

- Built a scalable medical AI assistant with a Flutter frontend and FastAPI backend, integrating Gemini AI for conversational support and Infermedica for diagnostic analysis.

Unistay – Student Housing Recommendation App

- Engineered a student housing app with Flutter and FastAPI,collaborating with backend services via FastAPI to synchronize and display dynamic data
