Portfolio: derrickjuma.netlify.app

SKILLS

- Mobile Engineering: Flutter, Dart, Kotlin, Jetpack Compose.
- Backend & APIs: FastAPI , RESTful API Integration.
- AI Integration: LLMs (Gemini), Data Analysis.
- Team Collaboration
- Problem Solving

LANGUAGES

- English
- Kiswahili

CERTIFICATIONS

- Software Development (Specialization in Dart and Flutter)- (PLP) Academy.
- AI Career Essentials – ALX Africa.
- Prompt Engineering – Simplilearn.

EDUCATION

Bachelor of Science in Data Science

Meru University of Science and Technology | 2024-2028

PROFILE

Results-oriented Mobile Developer specializing in cross-platform development with Flutter and native development using Kotlin. Leveraging a strong background in Data Science , I excel in building scalable mobile applications, implementing clean architecture , and seamlessly integrating AI models (such as Gemini) into mobile interfaces. Proven track record of enhancing user experiences, engineering secure payment systems, and leading collaborative development teams to deliver high-impact mobile solutions.

PROFESSIONAL EXPERIENCE

Lead, Android Community Meru University of Science and Technology | 2026 - Present

- Lead and tutor a cohort of student team members on mobile development best practices, focusing on building scalable applications utilizing Flutter and Kotlin.
- Spearhead the development of AI-powered mobile apps, successfully bridging machine learning models with intuitive mobile UIs.

Flutter Developer: The Brand AI | 2025 - Present

- Improved the core payment system by successfully integrating the Paystack payment gateway, ensuring secure and reliable user transactions.
- Currently driving the enhancement of the app's User Experience (UX) by conceptualizing and deploying new mobile features.
- Engineering a real-time team design collaboration feature within the mobile application to foster interactive, multi-user engagement

Key Projects

PesaLens

- Built a local-first M-Pesa tracking app using Kotlin and Jetpack Compose, currently in closed testing on the Google Play Store.

AfyaSmart – AI Health Assistant

- Built a scalable medical AI assistant with a Flutter frontend and FastAPI backend, integrating Gemini AI for conversational support and Infermedica for diagnostic analysis.

Unistay – Student Housing Recommendation App

- Engineered a student housing app with Flutter and FastAPI, integrating XGBoost and Random Forest models for rent price prediction with ~0.8 R^2 accuracy.
